Feature Spotlight

FRAME STORE

Store and recall frames to use when you most need them.

Frame Store allows up to 12 images or video snapshots to be stored and recalled.

This facility is invaluable as a type of safety feature where you can quickly put up a temporary frame while dealing with any number of situations. It is especially beneficial as a testing tool, allowing you to test looks without affecting your content.

- ✓ Store up to 12 images or video snapshots.
- ✓ Multiple formats supported.
- ✓ Have backup images ready to use as a contingency.

How to use Frame Store

Frame Store can be accessed by clicking on the Pattern tile and selecting the Frame Store tab from the Property Editor. Clicking on a thumbnail in the Frame Store displays the selected frame.

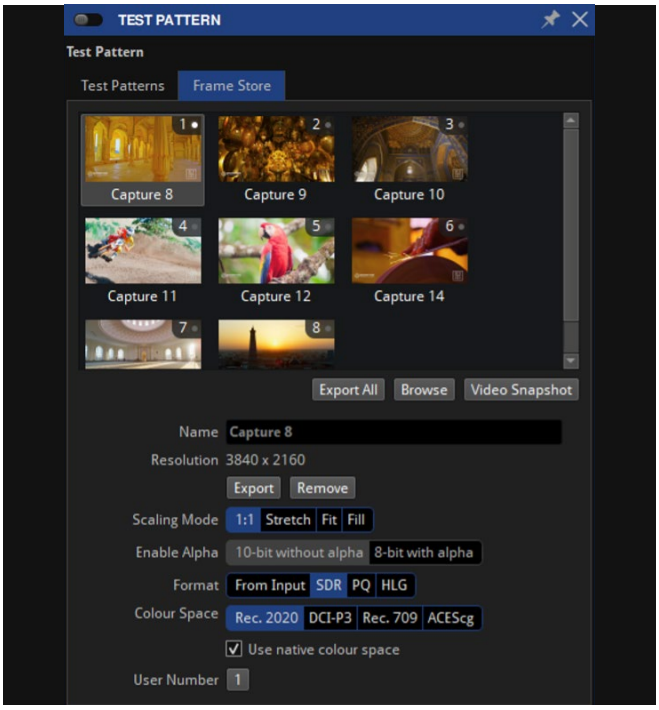
Images can be captured from video input as a snapshot, imported via Tessera Remote or uploaded locally from a USB key.

The formats supported for imported images are JPEG, PNG, BMP, GIF and TIFF, with a maximum resolution of 4096 x 4096. Frame Store also supports up to 16-bit TIFF and PNG files with alpha channel. However, 16-bit bitmaps are converted to 10-bit without alpha or 8-bit with alpha.

Video snapshots are captured as RGB TIFF files and displayed as 10-bit images.

Images or video snapshots can be mapped 1:1 on the active area, scaled both horizontally and vertically, scaled to fit or scaled to fill the active area. Frame Store supports Rec 2020, DCI-P3, Rec-709 and ACEScg colour spaces and SDR and HDR, in both PQ and HLG formats.

Images and video snapshots can also be exported to file via Tessera Remote or to a local USB key.



Brompton Technology is the market leader in LED video processing for the most demanding applications across key sectors including Virtual Production & ICVFX, Live Events & Touring, Corporate & Education, Broadcast & Studio and Esports. The company has won multiple awards and become a globally respected brand, known for the quality and reliability of its products and exceptional technical support.
